How to Integrate Data from New and Emerging Law Enforcement Technology

Wednesday, December 5, 2018 @ 1 p.m. EST

Presented by Jamie Roush, Chief Executive Officer of CRH Crime Analysis Consulting, Inc.

Facial recognition, Optical Character Recognition (OCR) systems, drones, mobile devices – are all making their way into law enforcement agencies at a fast pace. Each of these systems are **bringing new data sources** which enhance and can be **integrated with existing data systems**. This webinar will highlight these new and emerging technologies, as well as other technologies such as **body worn cameras and license plate recognition systems**, the data they provide, and **practical examples** of integrating the data for **investigations** and **crime fighting** efforts.

This webinar is intended for crime analysts and investigators.

Register Today!

What You Will Learn

- Acquire an understanding of new and emerging technology and the data for such systems.
- Learn how each type of technology enhances and integrates with already existing data.
- Obtain practical knowledge of integrating these data sources into already existing data structures for a more complete picture of events and people.
